

Tyler Technologies Acquires MobileEyes

Acquisition enhances Tyler's Nexus and Alliance initiatives by creating a complete offering for fire agencies

PLANO, Texas (Oct. 1, 2018) – [Tyler Technologies, Inc.](#) (NYSE: TYL) announced today it has acquired TradeMaster, Inc., commonly known in the industry as MobileEyes, a company that develops software to improve public safety by supporting fire prevention and suppression, emergency response, and structural safety.

“The acquisition of MobileEyes supports Tyler’s vision of creating safer communities through innovative technology solutions,” said Lynn Moore, president and chief executive officer of Tyler. “MobileEyes enhances our portfolio with flagship solutions for fire safety professionals. MobileEyes supports a critical life safety function that perfectly aligns with the public safety and civic services solutions Tyler offers and will help jurisdictions to better serve their communities.”

As one of the fastest-growing fire prevention solutions in the U.S., MobileEyes serves 240 clients, including the City of Indianapolis Fire Department in Indiana, the Sacramento Metropolitan Fire District in California, and Palm Beach County, Florida. Its easy-to-use, software-as-a-service (SaaS) applications serve fire prevention agencies, building departments, and sprinkler and alarm contractors, and perform custom inspections, produce professional reports, and quickly communicate findings to the right constituents.

MobileEyes offers applications specifically targeted at fire marshals and fire prevention departments. In many cases, these applications are replacing agencies’ paper-laden processes. MobileEyes brings great value to Tyler by providing a unique solution that will integrate with multiple products, allowing Tyler to provide a complete solution for all life safety functions.

“Our software solutions help facilitate better communication, more accurate reporting, and ultimately work to create a safer world, which aligns well with Tyler’s vision to create safer and smarter communities,” said Joe Krehel, president of MobileEyes. “We look forward to leveraging Tyler’s public sector expertise to collectively provide a more complete solution to fire agencies throughout the country.”

Founded in 2002, MobileEyes employs staff in offices in Atlanta, Georgia, and Troy, Michigan. With the acquisition, MobileEyes’ management and staff will join Tyler and will continue to operate from their current office spaces.
