

Three Cities Select Tyler Technologies' MyCivic Citizen Engagement Application

Cities in Texas and Louisiana to use solution to make real-time connections with residents

PLANO, Texas (June 19, 2019) – [Tyler Technologies Inc.](#) (NYSE: TYL) announced today that it has signed agreements with three cities to use Tyler's MyCivic™ citizen engagement application, including the cities of Boerne, Texas; Corinth, Texas; and Minden, Louisiana.

Each city was looking for a solution that would provide a better citizen engagement tool for their communities. City staff wanted an app that citizens can easily use on a day-to-day basis to connect with their local government, and ultimately selected Tyler's MyCivic offering.

MyCivic provides a centralized mobile platform that serves as the center of a jurisdiction's community engagement via a downloadable app. It is an ideal complement to a city's website, allowing easier access to the types of information citizens want to reach from a mobile environment. MyCivic provides an easy user experience for citizens looking to engage with their local government or community organizations.

According to Mike Raute, information technology director for the city of Boerne, "MyCivic combines functionality, practicality, and usability with a stimulating look better than anyone on the market."

Pamela Bransford, communications director for the city of Boerne, added, "MyCivic is going to be a great extension of our community outreach efforts. The way the app looks, feels, and functions gives our citizens an interactive way to gather information about their community."

"We're pleased to see more local government clients selecting MyCivic as a way to easily connect its constituents with their communities," said Dane Womble, president of Tyler's Local Government Division. "Tyler continues to provide solutions in emerging markets to make sure government is connecting with their residents in meaningful and impactful ways. We're thrilled that the cities of Boerne, Corinth, and Minden are moving the needle on citizen engagement through our application."

Boerne is part of the San Antonio-New Braunfels metropolitan area, and Corinth is part of the Dallas-Fort Worth Metroplex. The city of Minden is located in northwestern Louisiana.
