**EASY TO USE**

- minimal change in injection technique
- allows for single-handed activation
- clinician's hands and fingers remain behind the exposed sharp at all times

Attach EasyPoint needle to any luer lock or luer slip syringe. Administer medication according to institutional policy.

Push the color-coded tab, allowing the needle to automatically retract into the safety chamber. *This device is designed for activation before or after removing the needle from the patient.*

Dispose in an appropriate sharps container per protocol of institution.

---

**AUTOMATED RETRACTION** — now with — **ADDED VERSATILITY**

- Triple beveled, lubricated needle provides patient comfort
- Standard luer fitting provides secure, leak-resistant connection
- After retraction, contaminated needle is enclosed in safety chamber preventing exposure
- Needle hub & activation tab are color-coded for needle gauge
- Clear, compact safety chamber does not interfere with injection
